

TO: Presidents of national Societies of the ISBM
FROM: Education and Training Committee

Dear colleague,

As Education and Training Committee we are very interested in collecting relevant information about academic courses in Behavioral Medicine offered in the different countries

We would appreciate if you as President of your society could give us information about academic institutions and characteristics of this type of programme in your country (Master, Diploma, or PhD programmes). This information will be very useful to health professionals and students that would like to be trained in BM. Deadline for this request is January 31.

We are planning to publish a database with this information in the web of the ISBM in the first quarter of 2009. It would be excellent to have -at least- a small list with some data from each country.

Thanking you in advance for your collaboration,

Best regards,

Victoria Gordillo (Chair) gordillo@psi.ucm.es
